KEVIN CADELL IGNATIUS

Backend Developer

Profile

A Backend Developer passionate about problem-solving. Proficient in Python, C, Java, Golang, and TypeScript—you name it. For me, the programming language doesn't matter much, as the core concepts remain the same. However, I am currently most familiar with Python and PHP.

I also have experience working with frameworks such as Laravel, Sanic, Flask, and FastAPI.

Work Experience

2024

-

2023

PT Yuanta Sekuritas

Information Technology Developer

- Designed and developed secure, robust, and scalable REST APIs.
- Built responsive and dynamic CMS websites to meet client needs.
- Integrated and utilized third-party APIs effectively.
- Conducted mock trading sessions and maintained trading systems during weekends.
- Ensured secure data backups, safeguarding trading data integrity.
- Prepared comprehensive and detailed UAT reports for project evaluation.
- Provided IT support during personnel shortages, ensuring smooth operations.
- Created automation scripts for tasks like email notifications and data backups.
- Managed multiple tasks efficiently, handling 2-3 projects simultaneously.

2023

-

2022

PT Sumber Alfaria Trijaya, Tbk

IT Gateway Solution Programmer Analyst

- Managed end-to-end projects, ensuring on-time delivery within resource constraints.
- Developed, tested, and maintained high-performance applications.
- Enhanced existing systems by fixing bugs, addressing vulnerabilities, and adding features.
- Analyzed and documented software requirements.
- Collaborated with QA teams to ensure quality and reliability.

Hobbies

applications

2022

-

2022

PT Depo Indonesia

Senior Backend Engineer

- Create efficient and easy to read ERD for new projects
- Translate business flow into efficient algorithm
- Create and plan project timelines
- Build back end systems of multiple project at the same timeline
- Deploy projects to cloud server
- Create project documentations

2021

-

2020

PT Dolano NET Indonesia

Backend Developer

- Designed UML diagrams and efficient ERDs for new systems and services.
- Built and enhanced microservices, adding features like admin verification, and optimized existing ones for efficiency.
- Deployed services to cloud servers and maintained environments with comprehensive documentation and progress tracking.
- Participated in UAT processes, fixed reported bugs, and ensured seamless application functionality.
- Upgraded mail services utilizing the Mailgun API and developed a chat engine integrated into web and Android apps.

Education

2022

Universitas Kristen Satya Wacana

Bachelor of Informatics Engineering Informatics Engineering

- Assisted in teaching Mathematics, Programming, Computer Graphics, and Human-Computer Interaction as an Assistant Lecturer.
- Facilitated Java programming workshops for extracurricular activities.
- Managed financial responsibilities as Treasurer for Artificial Intelligence and Android Programming extracurricular programs.
- Secured Runner-Up and two 3rd Place positions in internal programming competitions.
- Developed freelance projects, including a website for blood sugar monitoring.
- Completed an internship at PT Dolano NET, where I developed a chat engine system using FastAPI.
